

How to Replace a Showerhead in 4 Easy Steps

You will need:

- Toothbrush
- Plumbing Tape
- WaterSense Labeled Showerhead
- wrench (optional)
- Cloth (optional)

Replace your Showerhead

Want to save money on your water bill? Replacing your showerhead with a WaterSense labeled showerhead can save you 20% or more on your water use without sacrificing that satisfying spray. WaterSense labeled showerheads come in a range of designs and prices, so you can find the model that suits your style and fits your budget.

1: Remove old showerhead.

2: Clean the thread.

3: Apply plumbing tape clockwise.

4: Twist on new waterSense labeled showerhead.

Save water by stopping leaks in your bathroom and all around your house.
